Dear Ms. ~~Bowers~~ *Bowers*:

Re: Geokinetics Revegetation Test Plots, Seep Ridge Project,  
ACT/047/002, Uintah County, Utah

Thanks you for the articles on reclamation techniques and especially for the information you provided on the test plots at Geokinetic's Seep Ridge Project site. My conversations with you and with Bland Richardson and your letter have been invaluable in advising the operator on reasonable reclamation materials and techniques.

The study has demonstrated that revegetation can be successful in the area and has provided the operator with an analysis of which plant materials will work best. The success of the test plots also make a good case for drill seeding as opposed to the easier/less expensive broadcast seeding.

Sincerely,

*Kathryn M. Mutz*
